Working on the vision system

Included in proposal

- What is the problem?
- How to solve?
- What resources are needed?
- Division of tasks?
- Architecture?
- What data are we using?
- How are we testing?
- How do we know it works?
- Where is the data?

- TDD?
- SAFETY COMPONENT!!!
 - Campus Risk Management
- Be realistic
- Gantt chart to outline task division
- Simulations? CARLA
- Definition of done?
- Scale?

AVOID:

- all working on the same task
- No hacking solutions

Will be marked on this

- Health and safety
- Professionalism
- Communication
- Management / Leadership
- Economic side of things

What will the system look like?

How can we tell the other teams that a pothole/cone/hazard was detected?
